Hi!

Thank you for your interested in our game Latte Stand Tycoon.

Directions:

The main goal of the game is to raise money by selling cups of coffee in your stand to passersby. Similar to the classic game "Lemonade Stand" you will set your ingredients the night before, and when you open shop you must stick with this recipe until you close again.

Your customers will give you hints to how well you've set your ingredients for the day, so pay attention.

The weather will change each day, and you must prepare accordingly.

There is also rental gear you can rent for a fee which will counter the effects of the current weather.

The game is fairly simple to play:

1. Press "Play" to begin
2. In the opening dialogue, you will be given $100 to get your first supplies
3. Once the opening dialogue finishes, visit the store to buy your supplies. There are only 3: Milk, Spice, and Coffee
4. After you checkout, visit the kitchen by pressing the "Prep" button in the previous menu.
5. In the kitchen you can adjust how much of each ingredient you will be adding to the mix. Each ingredient affects sweetness, caffeine, and temperature; which must be balanced based on the current weather.
6. Back in the previous menu you can click "Turn In" to begin the game.
7. As you earn money it can be used in the "Upgrade" section to repair your house, and eventually buy decorations and even upgrade and buy more stands (this is the main goal of the game).
8. You will be balancing your ingredients against the chaotic, daily weather patterns (look to the shop keepers descriptions to know how each ingredient effects the recipe.
