2. Getting Started
3. The Basics

1. Welcome

Hello and welcome to Pirate Popper VR. In this built for VR game the player is tasked with getting their stolen treasure back. The player will load their CannonBalls into their cannon to accomplish this goal.

The player can aim to get the treasure back as fast as possible or go for the high score.

We would like to thank you for buying Pirate Popper VR and we hope you have fun.

2. Getting Started

Please ensure that you have a VR headset and controllers to play this title. Download and install SteamVR, this will happen automatically in most cases. Once ready, launch the game and enter VR to start playing.

3. The Basics

To get started hit the Go button on your Right and the game will start. Each level has a limited number of physical CannonBalls. Pick up a CannonBall with your left hand and drop them into the loader to fire the ball to start clearing the level.

You will beat the level once the treasure has been hit.

Good luck!
