ADVENTURE FIELD IV

アドベンチャーフィールド4

GUIDE

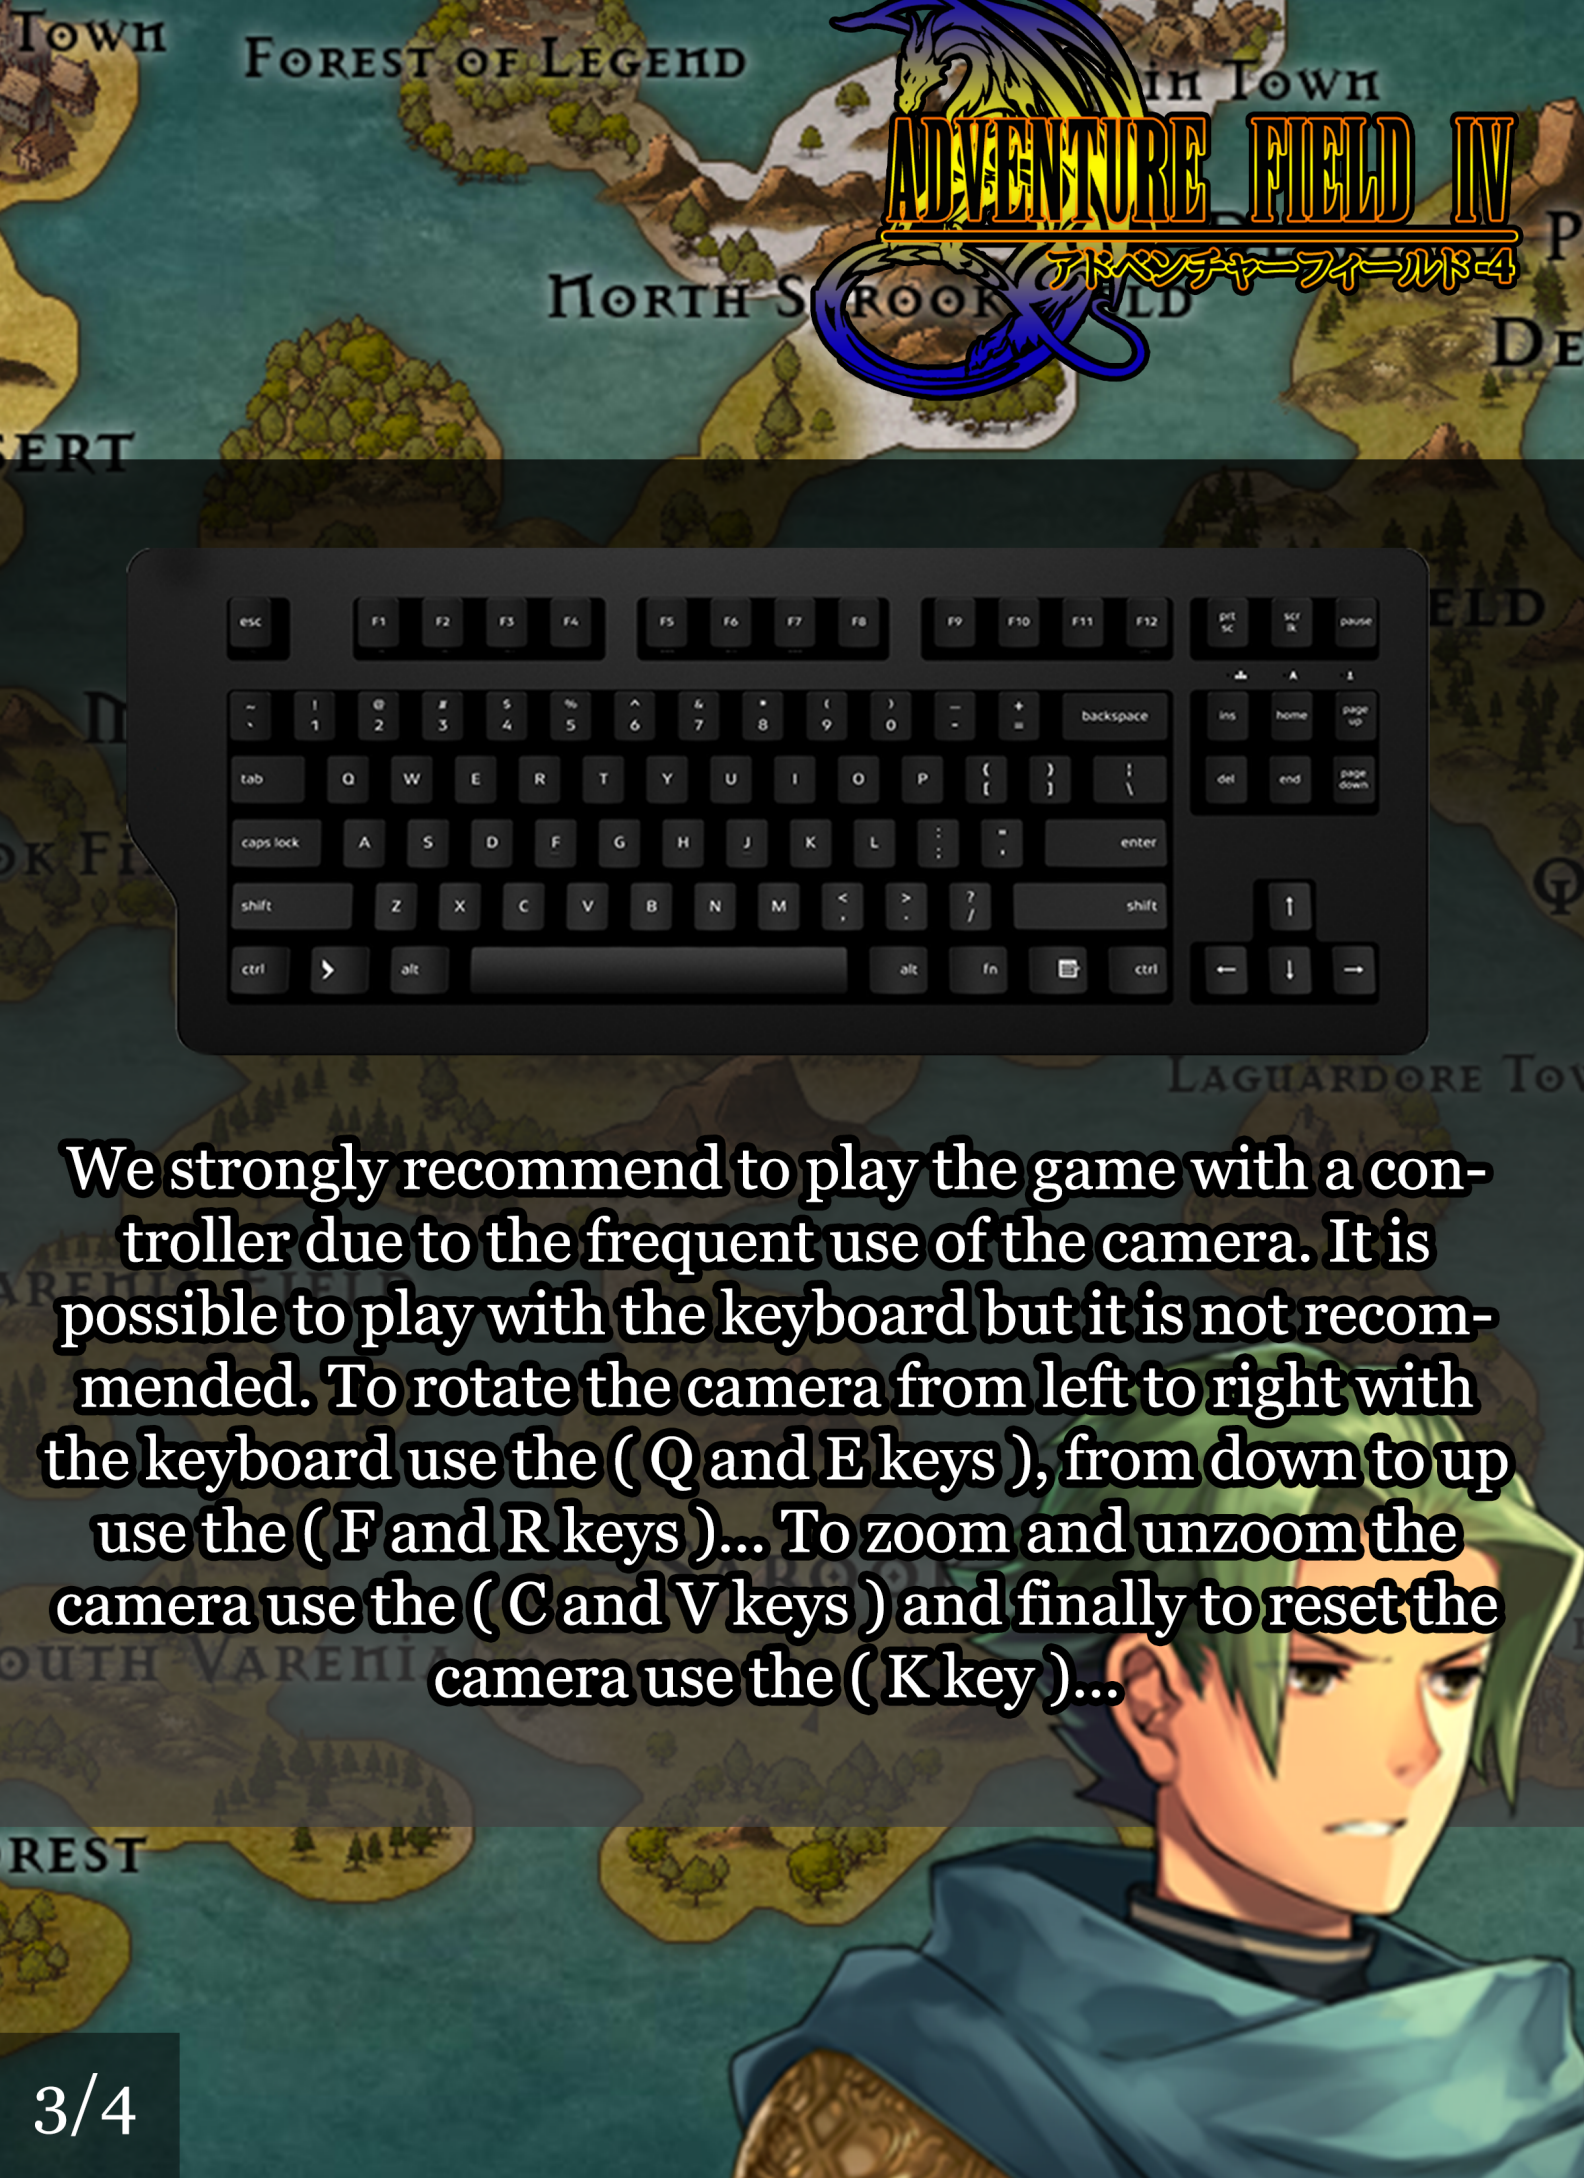

ADVENTURE FIELD IV

アドベンチャーフィールド4

You should play with a controller due to the fact that the camera is heavily used in the game. Use the B button to open and close the menu, use the X button to run, you can use the LB button to zoom in the camera, and RB to unzoom it. You can click on the right analog stick to reset the camera. The A button is the action button, use it to confirm, open doors, talk, etc...

We strongly recommend to play the game with a controller due to the frequent use of the camera. It is possible to play with the keyboard but it is not recommended. To rotate the camera from left to right with the keyboard use the (Q and E keys), from down to up use the (F and R keys)... To zoom and unzoom the camera use the (C and V keys) and finally to reset the camera use the (K key)...

ADVENTURE FIELD IV

アドベンチャーフィールド-4

Due to limitation of the smile game builder engine it look like the playstation controller cannot be used at this time. It will maybe become available in a futur update of the smile game builder engine...

F4

The F4 button can be used to toggle between fullscreen and windowed mode...
