Quick Reference Guide
TASK FORCE 88: HOSTILE CONTACT

Game Modes

Deathmatch - Kill every other player to get points.

Team Deathmatch - Kill the enemy players to get points.

Conquest - Control the objectives to earn points over time, the more objectives you control the faster your team gets points.

Rush - Destroy or defend the objectives, if the attacker team runs out of reinforcements the defender team wins.

Capture The Flag - Capture the enemy flag and bring it to your own base to earn points, if the enemy team has your flag you will have to retrieve it first.

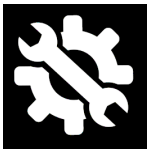

Kill Confirmed - Kill players of the opposing team and collect the dog tags from your team to deny the points for the other enemy team.

Different player classes are available; Assault, Support, Medic and Recon each with a special skill set. All perks and weapons issued immediately just like the real military. No need for tiresome grinding.

Assault Class 

Support Class 

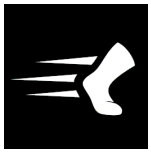

Medic Class 

Recon Class 

Perks

All perks are passive and once selected will remain in effect throughout the duration of the match.

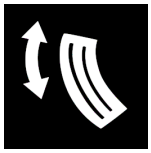

Extra Speed

Extra Health

Extra Ammo

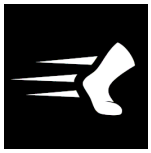

Extra Grenade

Special Abilities

Pressing [X] will enable this special ability, however, it will run out in 20 seconds or so. To continue to use this special skill press [X] again to enable.

Assault Class

Super Speed Boost ability. Run and sprint at twice the normal rate. Faster than the passive extra speed perk. Only available to Assault class.

Support Class

Plant Mine ability. Only one mine per cooldown cycle.

Medic Class

Heal yourself and teammates ability.

Recon Class

JetPack ability. Press and hold [X] to ascend and release to descend. Defy gravity and reach the perfect observation point. Your Jetpack fuel will run out in a few seconds so be cautious.

Multiplayer Connectivity - Internet

Play with anyone in your Steam region just be sure to be logged into Steam.

LAN - Local Area Network

Play with family or friends on your local network. You must be logged out of Steam and have it closed in order to connect with LAN. To start your LAN connection navigate to where your steam apps are installed,ie. C:\ProgramFiles(x86)\Steamapps\common\Task Force 88\TaskForce88.exe. Or whatever drive you have your steam apps installed on. Launch the file directly from here. In the multiplayer menu the LAN checkbox must be enabled. If this is done correctly you will now see your computer name listed in the Game Lobbies instead of your Steam Name. Make sure Steam is not running in the background. Now enjoy your LAN parties.
