

Setup

1. Download and Install CyberSurfer Desktop Game (PC)

- a. Download through [Steam](#), [Itch.io](#), or [Google Drive Link](#)
- b. Launch game through Game Platform
- c. Or Extract Folder and Open **CyberSurfer.exe** (Google Drive Link Version)

2. Download and Install CyberSurfer Mobile App (iOS/Android)

iOS TestFlight: <https://testflight.apple.com/join/l20KxOmz>

Android Download:

<https://play.google.com/store/apps/details?id=com.cybersurferllc.cyberphone>

3. Make sure both your desktop and mobile are on the same wifi connection
4. Open both CyberSurfer game and mobile app
5. Enter the Game Code on the CyberSurfer Desktop game into the mobile app
 - a. You should see a white input field to enter the code
6. When you are ready click on the "Connect" button to link the mobile app to CyberSurfer
7. You can now Navigate UI Menus and Control the Virtual Hoverboard (proceed to How to Play)

How to Play

Navigating UI Menus

Select a UI Element: Double Tap on your mobile phone touchscreen

Move to Another UI Element: Swipe up/down/left/right to move to the desired element

Control the Hoverboard

Move forward and backwards: Lean your phone forward and back

Turn the hoverboard: Tilt your mobile phone left and right

Hoverboard Abilities

Boost Up: Single Finger Tap on your phone touchscreen

Boost Forward: Single Finger Hold on your phone touchscreen

Do a Trick: Swipe up/left/right when in the air

Pause Menu

1. Enable Mobile App Options Menu: Hold two fingers on your phone touchscreen (currently might required two attempts)
2. Enable Desktop Game Pause Menu: Click the “Options” button, While the Mobile App Options Menu is enabled
3. Disconnect the Mobile App from CyberSurfer Desktop Game: Click the “Options” button, when the Mobile App Options Menu is enabled
