

BRIEF GUIDE

GENERAL INFO

League of Masters is the next generation of PvP! We've combined elements of Auto Chess and RPG to create a strategic game with a deep progression system. Showcase your wits and claim victory!

 LEVEL UP YOUR COMMANDERS
AND DOMINATE

In League of Masters, there are a whopping 12 unique commanders! Each has numerous way to acquire abilities that increase damage and enhance tactics. Even if your opponents lack experience and skills, their commanders can be much stronger than yours, so you always need to be on guard and adjust your strategy as the battle unfolds.

 CHOOSE FIGHTERS WISELY

The game features over 50 units of different classes and synergies for both PvP and PvE battles. Assemble an unbeatable team and test different strategies to find the perfect one.

CROSSPLAY ON PC AND MOBILE

MAIN MENU

League of Masters have the following game modes available in Main Menu:

- RATING BATTLE: Classic auto chess mode. Increase your battle prestige by outsmarting opponents. Details on slides 6-7;
- ADVENTURES: Story campaign mode, idle PvE that allows players to get additional loot for progressing through the game. Details on slide 8;
- PLUNDER CASTLES: Asynchronous PvP mode, where players need to seize enemy castles and plunder treasures. Details on 9-11;

Other pages available via Main Menu:

- COMMANDERS - Details on slides 4-5;
- BANK, BAG, MAIL, CONTACTS - Details on slide 12.

RATING BATTLE

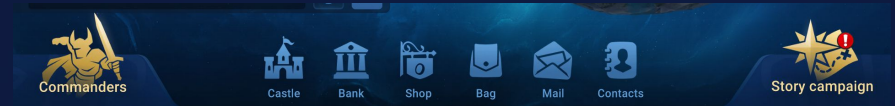

ADVENTURES

PLUNDER CASTLES

MENU BAR

COMMANDERS

DOMINATE THE BATTLEFIELD!

Commanders are the **backbone** of your army

While not participating the battle themselves, commanders stats are what determines **how much damage you do to the opponent** after autochess win - or how much you take if you lose.

Their skills also support your combatants and further increase damage dealt to enemy commander

COMMANDERS

FORGE YOUR LEGEND!

This is the main hub for character development. Master the art of war with **12 unique commanders** to unlock, powerful gear to forge, and resources to hoard.

Collect, conquer, and customize: use your gear and experience spheres to strengthen your build and character.

COMMANDERS

Equip your Commander with artifacts and gear to boost their stats and abilities.

You can:

- Increase the level of your equipment (using gold coins);
- Merge items to make them stronger;
- Enchant items, which will grant your commanders additional abilities.

COMMANDERS

Once ready, ascend your commander to next rarity level

This will not only make them stronger but also will grant you the talent crystal

- Merging identical items will not only increase their rarity but also grants a talent crystal;
- Crystals unlock passive abilities in Talent Academy;
- All your commanders benefit from unlocked talents.

TALENTS

Talent tree is used to further boost all your Commanders at once

Along with Abilities provided by enchanted gear this makes for a powerful tool to tailor your progression and **overpower** Commanders

RATING BATTLE

Classic auto chess arena mode.

Increase your battle prestige by outsmarting opponents.

Similar to battler and auto chess games, win battles to climb the ladder. The banners in the screenshot display current rank of your Commander and the total player pool. Each Commander has their own rating

Surpassing specific ranks unlocks valuable rewards for upgrading your Commanders.

RATING BATTLE: CORE GAMEPLAY

- **Be the last player standing by building a strong team** of fighters. You play against 7 other players: together you form a bracket that shifts as the battle progresses
- **Each round, buy and sell fighters**, equip them with items, and position them on the board before they fight other players' teams.
- **Win or lose rounds to gain gold**, and unlock stronger champions.
- **Champions have synergies** based on traits, so try to build a team that works well together.
- **How you place your fighters on the board** can make a big difference in combat.

ADVENTURES

STORY CAMPAIGN PVE MODE.

This mode allows players to earn additional loot as they progress through the campaign.

By default, the campaign runs on autopilot, but you can take manual control to directly impact the story and learn more about the characters.

Make sure to collect loot from, which will be available in the treasure chest on the left (see screenshot).

CASTLE // OVERVIEW

Your castle is your hub, offering perks through Talent Academy, player interaction through battles (Energy Fountain), and cooperative elements (Friendship Tree).

More features are coming soon (see next slides for castle screenshots).

CASTLE // PLUNDER CASTLES

Castle defense and plundering define League of Masters' unique asynchronous PvP mode.

Your Treasure Chest contains loot you acquire over time. Until collected, that loot is vulnerable to plunder.

To protect your castle from enemies you need to position your Commanders on castle walls. They will take guard and automatically fight off the invader.

To find castle to plunder press Enemy Castle icon and then spend energy to attack

CASTLE // ENERGY FOUNTAIN

**ENERGY IS THE
MAIN RESOURCE
ALLOWING YOU TO
ATTACK ENEMY
CASTLES.**

CASTLE // MISC

Artifacts Hall houses your collection of artifacts. Activating the right artifacts is crucial if you want to speed up your progression!

Friendship Tree grows as you interact with other players. Make sure to bless your friends to give them advantage in battle and grow your tree!

MISC

Shop & Bank (Coming Soon):

Enhance Commanders and accelerate progress! These features unlock at launch, offering options to boost your commanders and potentially propel you into higher-ranked battles faster.

However, true mastery comes from honing your strategic skills against other players.
