

B.A.D

BATTLE ARMOR DIVISION

Year 2512

More than 200 years had passed since colonization on Mars had begun. A slow process of terraformation had begun, occurring in the atmosphere and modifying its chemical composition.

Despite the rarefied air and radiation, millions of people inhabited the planet. Mars was exploited for its mineral resources, but it served above all to reach the moons of Jupiter.

In 2437, a new mineral called Ixenio was discovered on those moons. Ixenio was known to be indestructible over time, the hardest of hardest metals and able to generate an incredible quantity of energy through exposure to photon beams... it was the new black gold.

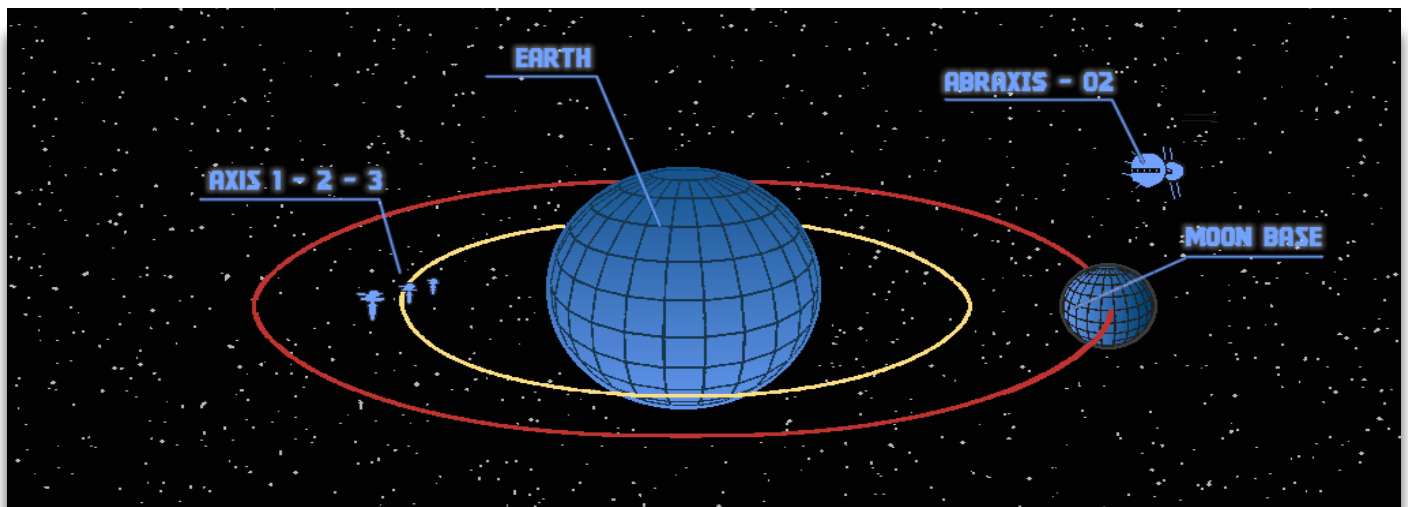

In 2512, Mars was aware that it had become a superpower and it took advantage of the conflict between the Euro America League and the Asiatic Union to form and declare the Independent Martian Kingdom, I.M.K.

The Asiatic Union sided with the I.M.K. while the Euro American League still claimed its own rights. The total war was just around the corner.

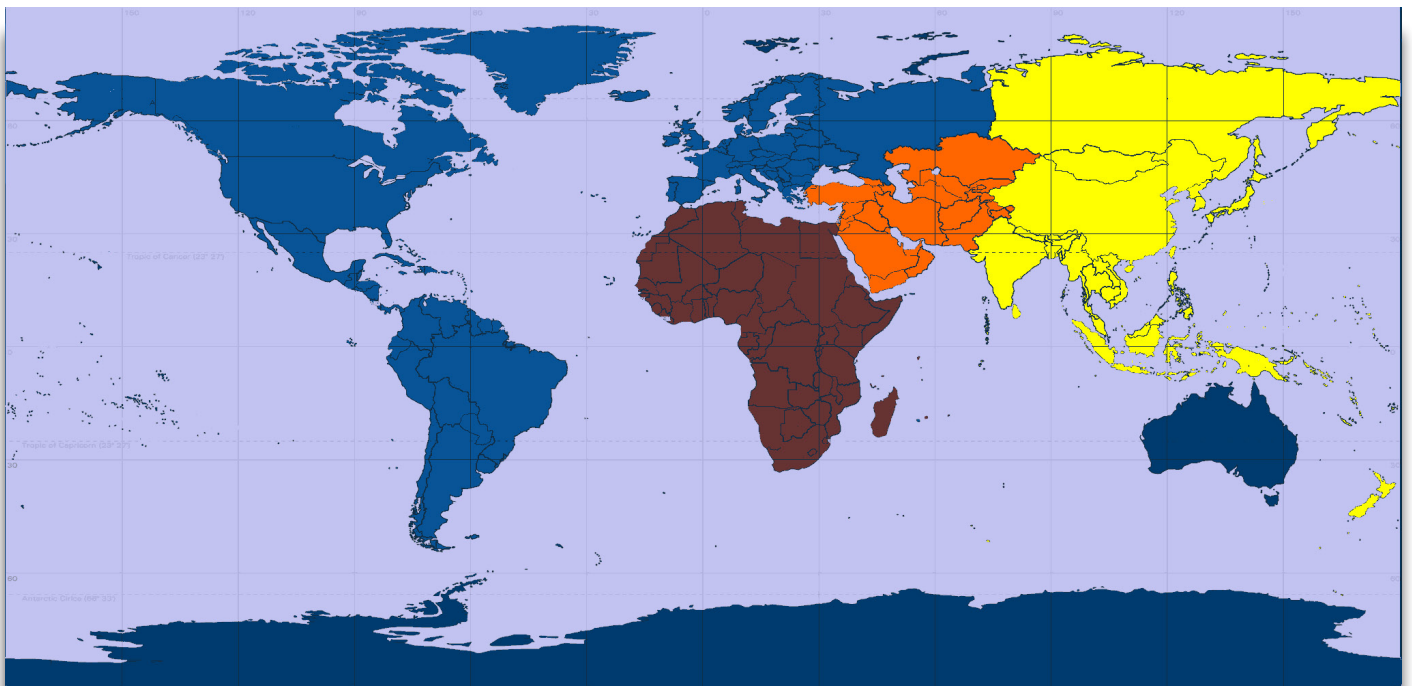

The I.M.K. suddenly attacked Moon Base, using the asteroid fortress Abraxis as its logistic base. It conquered Moon Base and exploited it to send troops on Earth in support of the Asiatic Union.

It was the beginning of Interplanetary War I.
