

Burger Maker

User Manual

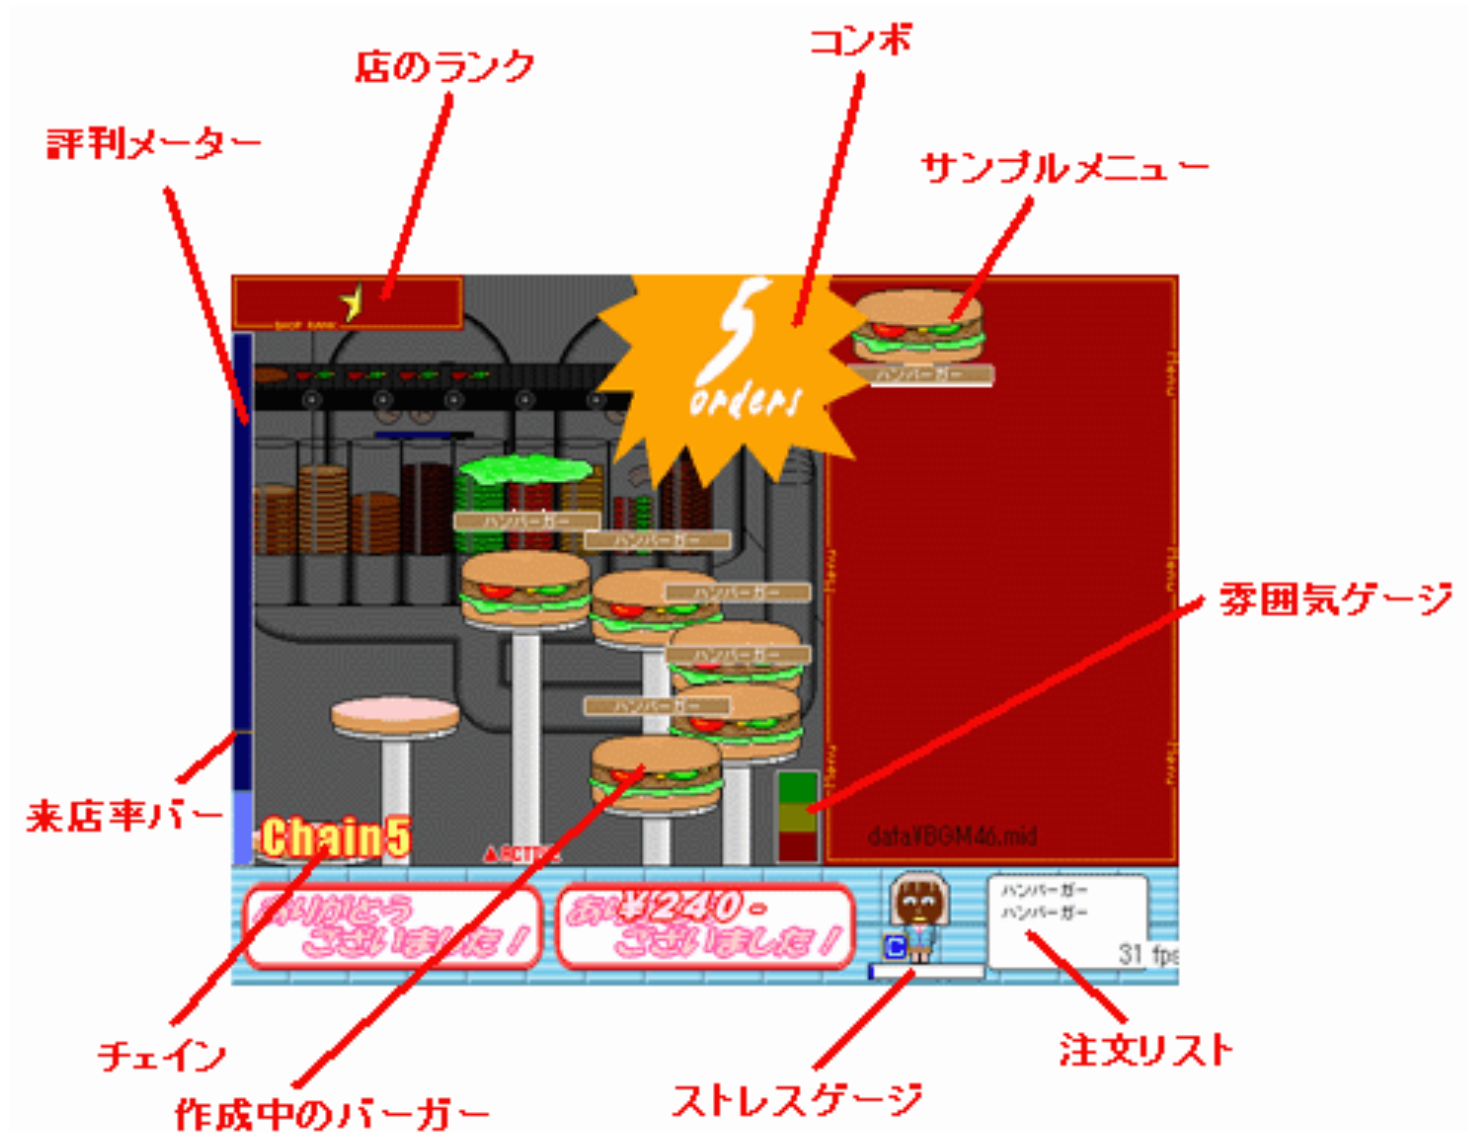

In this game, you operate a machine called the Burger Maker to build burgers exactly as customers order them.

About Game Modes

Start Game	Starts the main game.
Rankings	View the top 5 past rankings.
Credits	View the staff credits. This option is unavailable until you have achieved a 4-star or higher shop rating.
Fullscreen Mode Windowed Mode	Switches the display between fullscreen and windowed mode.
Quit	Exits the game.
PlayTime PlayCount	Your total play time and number of play sessions. These are still counted even if you quit partway through.

About the In-Game Screen

Burger in Progress	Shows the burger currently being assembled by the Burger Maker. Up to 10 can be placed on the turntables at once.
Sample Menu	Shows a sample of the burger. Match this sample exactly to complete it.
Order List	Shows the items customers have ordered. Items already delivered appear in red text. The order is complete once everything has been delivered.
Stress Gauge	Shows how stressed a customer becomes while waiting. If it fills completely, the customer will get angry and leave. Mistakes cause it to build up faster.
Mood Gauge	Shows the shop's mood. It decreases over time. It affects how quickly stress builds up for newly arriving customers. You can raise it by chaining combos.
Reputation Meter	Rises when you successfully complete customer orders, and falls when customers leave angry. Reaching the maximum raises your shop's rank. If it drops all the way to zero, the shop goes bankrupt.
Customer Visit Rate Bar	Shows the likelihood of a new customer arriving. It rises along with your reputation. Even if your reputation drops, this bar stays where it is.
Shop Rank	Shows your shop's current rank.
Combo	Delivering burgers in quick succession builds a combo, increasing your score.

	It also restores the Mood Gauge at the same time.
Chain	The number of orders completed in a row without mistakes or discards. This affects your score.

In-Game Controls

Left / Right Arrow Keys	Rotates the Burger Maker's turntables.
Down Arrow Key	Makes falling items drop faster.
Z / X / C Keys	Hands the frontmost burger to the corresponding customer.
Space Key	Discards the frontmost burger.
Shift Key	Displays detailed data such as your score.
Tab Key	Pauses the game.
Esc Key	Force-quits the game.

About Resetting Data

If you want to reset your ranking information and play data, delete the "**Rank.dat**" file in the game's folder, and the ranking information will be restored to its initial state.
