Reset / undo

Resetting a screen takes you to the True Entrance to that screen. This helps avoid getting stuck and makes backtracking a breeze.

If you ever find yourself wanting to go back to another area, but find your path inaccessible, just press A and you go right back to the start!4

Pressing the B button will undo your actions, but be careful! You can only undo 32 steps at a time!

Holding the run button and any direction will move continuously instead of one space per button press, but be careful! You could run right into an enemy!
