Hard Drive	25 MB free space
3D Accelerator	DirectX 8.1 compatible graphics card with 64 MB memory
Sound Card	DirectX 8.1 compatible
Input	Keyboard and Mouse
DirectX Version	9.0c

Installing Virtual Race Car Engineer

=====

You may need to have administrator rights to install and run Setup Fu - Setup Wizard on Microsoft Windows 2000/XP/Vista. Right Click on the icon and select 'Run as administrator'

Adding your own language translations

=====

You may add your own language translations by creating a copy of the LNG file located in the C:\SetupFu\Dialog folder and edit each line of text. Do not edit the text within the square-brackets [] or any numbers before the equal-sign "="

ADVICE

=====

The one item that will benefit your setup time greater than any other item is the one sitting behind the steering wheel: You. If you do not know the track or the proper racing line, no setup changes will help you. You must take the time to adjust "you" before adjusting your car. Only when you can do multiple consistent laps should you begin to alter your setup.
