

# THE VU

## DO YOU CREATE YOUR REALITY?

Explore the VU and find out.

The VU is a revolutionary content creation and exploration platform for Virtual Reality.

Flying in the VU is a weightless and transcendent experience.

The VU provides new insights into the nature of time, space, symmetry, and scale.

The VU is a prototype plasma dynamics generator.

The Platonic Solids provide a scaffolding to create infinite spatial harmonies.

Custom GPU compute shaders charge a plasma cloud each frame at 90 fps.

The VU and your creativity await you.

The VU runs on the HTC Vive.

# ARGOS.VU

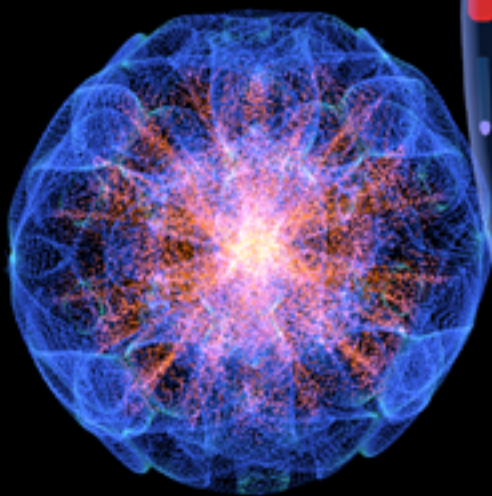

Argos.VU has launched the early access version of The VU on HTC's VivePort in two versions: A free version is available for educational use and a professional version that provides file IO and point cloud import and export.

## THE VU

The VU was demonstrated at the recent 2017 Electric Universe conference in Phoenix, AZ.

Participants experienced multi-scalar flight and an exploration of a Jim Weninger's Helical Model of the Solar System's Path in the Local Interstellar Cloud.

A model of Dr. Donald Scott's Birkeland Currents was also demonstrated.
